(State of the American Workplace by Gallup, 2017)
Federal Employee Viewpoint Survey (FEVS)

An annual survey administered by the U.S. Office of Personnel Management (OPM)

Employees’ perceptions about their work experience, organizations and leaders

Open to all eligible federal employees (i.e. Full- and part-time permanent, non-seasonal employees, including Title 42 and Commissioned Corps employees, on-board on or before October 27, 2018.)

Voluntary participation
66.4% response rate in 2019
NIH employees are highly engaged!
What’s Employee Engagement?

Many definitions

A sense of connection and commitment to an organization that motivates employees to work toward organizational goals

Drives productivity and performance

Engaged
• Team-oriented
• Optimistic
• Goes above and beyond
• Solution-oriented
• Shows a passion for learning

Disengaged
• Self-centered
• Pessimistic
• Accept credit but passes along blame
• Negative attitudes
What’s Employee Engagement?

Job Satisfaction

Salary
Benefits
Leave time
Work environments
Job security

Engagement

Sense of purpose
(e.g., job assignments, org missions)

Communication
(e.g., relationship with managers and co-workers)

Opportunity to grow
(e.g., learning, advancement)

Trust
(e.g., leadership integrity, fairness)

SHRM’s Developing and Sustaining Employee Engagement Toolkits, 2017
The Conference Board’s DNA of Engagement, 2019
Measuring Employee Engagement with FEVS

FEVS Employee Engagement Index (EEI)

- Intrinsic work experience (e.g., feeling of accomplishments, talents used well)
- Supervisor (e.g., trust supervisor, listen to what I have to say)
- Leaders lead (e.g., leader honesty, integrity, respect for leaders)

**OPM:** The EEI is not a direct measure of employee engagement but it provides an assessment of the critical conditions conducive for employee engagement, or *engagement potential.*
Refining Measure of Engagement

- **Purpose/Intrinsic work experience** (e.g., feeling of accomplishments, talents used well, like what I do)
- **Relationship with supervisors** (e.g., trust supervisor, listen to what I have to say, treat me with respect)
- **Cooperation among co-workers** (i.e., share job knowledge with each other, cooperate)
- **Respect for organizational leaders** (e.g., generate motivation, leader honesty, integrity, respect for leaders)
- **Opportunity to grow** (e.g., opportunity to improve, feeling satisfied with training)
- **Fairness in work units** (e.g., merit-based promotion, deal with poor performers, recognition based on performance)
- **Ownership/Empowerment** (e.g., involve in decision making, feel encouraged to come up with new things)

*Are there any gender differences?*

</table>

*Significant differences based on 95% confidence interval
Remember that Gallup showed female employees are generally more engaged at work.

We did not see this difference in the NIHFEVS data.

Gallup also found that for those in leadership roles, men are more engaged than women.

(Gallup State of the American Workplace, 2017)
Does Supervisory Status Matter?

Gender difference found at the non-supervisory level.
A similar pattern was found for relationship with supervisors, empowerment, and fairness in work units.
Take Home Messages

• NIH federal employees more engaged than general federal workers.
• We gained a better understanding of gender difference by examining the drivers of engagement.
• Gender differences were found in *social and interpersonal interactions at work, opportunity to grow, ownership/empowerment, and perceived fairness in work unit*.
• Gender differences were more consistently found among *non-supervisory employees*. 
COVID-19, Gender & Employee Engagement

• More men, than women, who are with dependents and working remotely felt their work has been positively affected by the COVID-19 crisis (McKinsey & Company, June 2020).

• Working mothers work hours has reduced faster than working fathers since the COVID outbreak (Collins, Landivar, Ruppanner, & Scarborough, 2020). Who is taking leave to care for dependents?
